SKILLS

Android Development

java | xml | kotiln

Web Development

html | css | javascript | vue.js

WORK EXPERIENCE

Software Engineer at Foresting **July 2018- Current**

http://foresting.io

Blockchain-based Social Media platform

- Writing and translation about technical white paper
- Design mobile client architecture and develop

Assistant Engineer at Samsung Electronics **February 2014- March 2018**

http://www.samsung.com/sec/

Developed Android framework and application/SDK within Samsung Galaxy Flagship Devices.

- Developed 2nd party application based on edge screen framework. Yahoo YQL, Kakao, Naver, and Twitter are API-based applications that use a lot of network, but because of the environment that can not use other licenses library, I used Volley built in Android Framework.
- Improved the performance after analysis through the application profiling of the setting or view in the edge screen framework. As UI / UX changed, I was responsible for the GUI operation of the app.
- Improved the structure for Samsung Galaxy Smart Cover SDK and Framework . i was responsible for API development between SDK and Framework, structure improvement, and interworking with other applications. i have improved the performance of Window Layers and View
